

STEEL FABRICATION

RESIDENTIAL FABRICATION

NX Steel offers comprehensive residential fabrication services, guiding clients from concept to completion with a focus on total satisfaction. Our collaboration with architects and interior designers allows for customized steelwork, made in-house to ensure greater control over the style and finish. Services include the fabrication of high-quality property features such as steel moment frames, 3D modeling, stair railings, pergolas, balconies, decks, and supporting beams, all tailored to the specific needs of each project.

COMMERCIAL FABRICATION

NX Steel's commercial fabrication services cater to a broad range of projects, from straightforward staircases and platforms to intricate catwalks and steel press boxes. Our expertise extends to both routine maintenance tasks, such as factory platforms, crossovers, and railings, and custom fabrications. We are dedicated to restoring functionality and durability, leveraging skilled technicians to manage and execute a variety of commercial fabrication needs efficiently.
