

RESIDENTIAL FABRICATION

NX Steel offers comprehensive residential fabrication services, guiding clients from concept to completion with a focus on total satisfaction.

Our collaboration with architects and interior designers allows for customized steelwork, made in-house to ensure greater control over the style and finish.

Services include the fabrication of high-quality property features such as steel moment frames, 3D modeling, stair railings, pergolas, balconies, decks, and supporting beams, all tailored to the specific needs of each project.
